

## Technology Transactions

The Technology Transactions Group focuses on the interface of the legal, technological and commercial elements of strategic technology transactions that are an essential component of any successful business strategy in today's technology-driven world. The team advises not only clients whose core business involves the development and commercialization of technology, but also clients who use third party technology to support their operational infrastructure.

Our lawyers have deep experience assisting clients in navigating the plethora of legal and commercial issues that modern technology transactions entail, with global reach. The group provides support to clients in their major corporate and IP transactions and has specific experience with the complex issues that arise in structuring and negotiating technology transactions.

The group advises clients in a broad range of industries, including information technology, augmented reality, online gaming, digital diagnostics, robotics, content management, life sciences, pharmaceuticals, agritech, software development, Software as a Service, e-commerce, and university technology commercialization and research licensing in transactions involving technology companies, software developers, manufacturers and distributors, contractors, consultants, startups, and technology investment funds and fund managers.
