

How NFPA 921 and NFPA 1033 Can Make Or Break Your Fire Loss Subrogation Claim

National Association of Subrogation Professionals, Annual Conference
(Washington, DC)
10.29.19

Chris Konzelmann will present at the National Association of Subrogation Professionals (NASP) Annual Conference. His presentation, "How NFPA 921 and NFPA 1033 Can Make Or Break Your Fire Loss Subrogation Claim," will outline the industry required qualifications for origin and cause investigators and the ramifications of using a fire investigator that does not meet the minimum requirements – a Daubert challenge.

The presentation will review NFPA 921 provisions that subrogation professionals can use to strengthen their claims, provisions that can and will be used by the adverse party to defeat an otherwise valid claim, and provide practice pointers for using the publication to increase the value of a litigated matter.

Chris also serves as the Co-Chair of the 2019 Litigation Skills Conference Committee. This presentation marks his sixth time presenting at the annual conference.
