

Fire Spread – Beyond Origin and Cause

NASP Webinar
9.17.19

PRACTICE AREAS

Subrogation

Shannon Warren, associate in the Subrogation department will join the Arson Investigators Subrogation Webinar Series on September 17, 2019. Shannon, along with her co-presenter Jay Kramarczyk, will present the panel, "Fire Spread – Beyond Origin and Cause."

This webinar will focus on the matter of 'spread' in subrogation matters, as opposed to the traditional origin and cause. Although this is primarily for fire losses, it can also entail water losses or other aspects of property damage. Often times the origin and/or cause of a loss cannot be determined, however, that may not mean that subrogation is a lost cause when the spread of the loss can be a critical factor. Related to fires this can be the fuel loading, suppression system, detection or alarm system, egress components, occupant or fire department response, or several other factors.
